## ne radi vam \"zapamti me\"

Posted by flylord - 2009/06/16 23:35

---

ne radi vam check box zapamti me na login formi :S. Nije da mi je tesko da kliknem svaki put na dugme za logovanje, ali me ipak mrzi :S, kad vec postoji mogucnost...

Jel bi mogao neko to da sredi?

---

Za sve one koji imaju problema sa logovanjem, proverite da li vam u browseru pise "borenje.info" ili "www.borenje.info".

Mislim da problem nastaje kad se pristupi bez "www" (meni je bar resilo problem).

---

## Re:ne radi vam \"zapamti me\"

Posted by flylord - 2009/07/12 21:48

---

ovako :)

IceCold je u pravu. Cookie je lose napravljen, i onda "zapamti me", radi samo za poddomen na www, a ne i za ceo domen (borenje.info).

Za vas je najlakse resenje da ubacite ovaj kod u fajl koji se zove .htaccess

```
RewriteCond %{HTTP_HOST} borenje.info$  
RewriteRule ^(.*)$ http://www.borenje.info/$1
```

i da to stavite neposredne posle sledece linije:

```
RewriteEngine on
```

I poprilično sam siguran da imate taj fajl :)

I cisto da napomenem ovde. Ako se ne varam borenje radi na joomla. Vi ste makli copyright sa dna sajta (tamo gde pise © 2009 Borenje.info, Milos Malic ) i to je krsenje zakona i autorskih prava, a nije tako tesko samo ispod vaseg copyright-a dodati powered by joomla, i link ka njihovom sajtu.

Mozda vam smesno zvuci za nasu drzavu, ali lako moze da se desi da vam izgase sajt dok to ne vratite :S, a to bi bila jako velika steta...

Nisi u pravu. Kad već advokati idu za Joomla grupu i oni sami za sebe ne rade niti bilo kome to traže, da ti i odgovorim.

1. Pročitaj ponovo njihov Licence Agreement i nađi gde piše da je **OBAVEZNO** držati taj link. Ti ga nađi, ja ću da ga dodam. Ja ga nisam našao kad sam prošao put našao. (Istovremeno primeti da Fireboard-ov stoji)

2. Na svaki sajt koji našao da ga držim, ja ću da ti nađem još dva koja ga ne traže, u mnogo urećenijim državama nego naša.

3. Copyright jeste moj. Ja ovde ljudima ne dajem joomla paket za download pa ih dovodim u zabludu da imam prava na taj software. Postavka ovog sajta, logika po kojoj je ustrojen, urećenje.. sve je moj kopirajt. Sav sadržaj je istovremeno vlasništvo autora i vlasnika sajta od momenta kad se objavi. Na to takođe ja i autor imamo kopirajt.

4. Na ovom sajtu niko ne krije na kom engine se vrti. Kad pogledas tagove u izvornom kodu, videces Generator koji ima sadržaj: "Joomla! - Copyright (C) 2005 - 2006 Open Source Matters. All rights reserved." Da mi se prikriva nešto, prvo bih to uklonio.

Elem, Copyright nad Joomla engine (ali čak ne i svim komponentama na kojima se ovaj sajt vozi) ima Joomla team. Copyright nad sajtom imam isključivo ja, to jest mi posto nas ima nekoliko a ja sam potpisan.

---

Pošto si nas optužio da u najmanju ruku kršimo autorska prava, ako ne i zakon, očekujem da se potpiše i tvrdnje potkrepi argumentima. Ako si u pravu, sve korekcije će biti izvršene u skladu sa zakonom i autorskim pravima.

-----  
Dopuna:

<http://forum.joomla.org/viewtopic.php?f=428&t=324056>, da ne brineš sajt neće niko izgasiti

I feel so happy to have the chance to make a speech. The title of my speech is Protect the Environment, Protect Ourselves. I hope you will like it.

Everybody knows waste paper and used coke cans are discarded everywhere. You might have seen plastic bags flying in the sky and getting caught in the trees when the wind blows or maybe you have seen old cans floating in the rivers and polluting the water. Our environment is the place in which we live, but it is being ruined by us. wow power leveling

There is a story about house and trees. It is said that a man's house was surrounded by a lot of trees.

Though the wind was strong, that man could have a good rest under the trees. How comfortable the life was!

One day, that man wanted to enlarge his house, so he cut down all the trees. Then the autumn came without the protection. The strong wind blew the roof of the house into the sky. The whole house was gone with the wind.

What a pity! But that's the price people have to pay for destroying in the ecology balance. People shouldn't be short-sighted. Protecting the environment is everyone's task.

world of warcraft power leveling  
As you know, there are four kinds of pollution. They are air pollution, water pollution, waste pollution and noise pollution. But what can we do to solve the pollution? I think, firstly, we can make cars that don't pollute the environment. We can ask companies to use modern clean technology. In some big cities, we can limit the number of cars. Secondly, we can try to use less water and make sure that we do not pollute the water.

age of conan power leveling

We can tell factories that they are not allowed to pour waste water into the lakes and rivers. Thirdly, we should not throw rubbish in parks and cities. We can pick up rubbish if we see it. We can put more rubbish bins in our parks and cities. Fourthly, we can live far from the noise and make the laws to limit the noise.

The air, water and the whole atmosphere directly influenced our lives, such as the air, people may cough and it will lead to cancer. So we must try our best to keep the world clean and tidy. To reach it, I want to put forward three points to everybody---Point 1: don't spit and liter; Point 2: don't draw on the wall; Point 3: clean the streets every day.

In order to make the environment clean, let's join our hands together to make the world better.
